

Complex Formulas. Simple Solutions.

Vicinity's scalability makes it a top choice among batch manufacturers. It integrates easily with **Microsoft Dynamics®** to deliver a comprehensive software solution that grows with your client.

At Vicinity, we offer software implementations and upgrades adapted to suit each client's unique requirements, responsive ongoing technical support, and access to expert-level business consultation, making us a dedicated partner to Value Added Resellers (VAR's) and manufacturers. Whatever operational challenges your customers are experiencing, simple to complex, we are equipped to provide efficient solutions.

Designed on the .NET platform, Vicinity provides a single point of integration with the most popular financial and distribution management applications. That means Vicinity offers process manufacturers the ability to automate and improve more of their operation with less implementation effort or operational disruption than ever before. Combine that with a highly experienced VAR and clients can expect a more rapid implementation tailored to their needs delivering a faster return on their ERP investment.

Integrated with leading Microsoft Dynamics ERP systems GP, NAV, & SL

Vicinity software has proven integrations with each of the Dynamics SMB ERP solutions. With quarterly software releases, Vicinity maintains a fast-paced deployment schedule to stay up-to-date with the latest versions of GP, NAV, and SL while preserving system support to keep data seamlessly in sync.

Designed exclusively for formula-based manufacturing

Vicinity is built to enhance the investment in Dynamics by cutting costs while supporting growth through efficiency improvements. Our code caters to the intricacies of batch manufacturing and our formula-based production application allows for the needed flexibility while delivering a rich feature set across production logs, scheduling, and QC.

Access to a dedicated team of formula manufacturing experts

Vicinity is powered by a team of software developers, technical experts, and business consultants with 30+ years of experience working with process manufacturers. Our team has led successful implementations in industries spanning the batch manufacturing market. Count on us as your go-to formula manufacturing resource.
